

# FEEDBACK

"The capacity to learn is a **gift**; the ability to learn is a **skill**; the willingness to learn is a **choice**."  
- Brain Herberr

Please be honest, constructive and specific so that I can identify what I should improve and what I should adapt in our new semester.

1. What do you like most about this semester?

The most beautiful part of this semester was to collaborate all the components together and to make structure of car.

2. What would you like more in coming semester? If we do similar activities should we consider any modifications?

I would like to see the project of new components, and more details course of programming.

3. What is something that you know you need to work on as a HMG student? How might you develop that skill in this semester?

This is 21st century also called technology era, we need knowledge about technology. This project is the basis to learn about technology.

4. What are some specific strategies that your instructors have used that have helped you understand/made you interested in past activities?

specific strategies :  
→ our instructor used projector to understand clearly by showing video related to the project.

5. Why did you continue to be a member of HMG? What are you hoping to learn in the new semester?

I continued to be a member of HMG becoz I am interested to learn more knowledge different components. I am hoping to learn more detail abt programming that we did in car project.

6. Is there anything about the structure of the club or activities that could be change/adapt/improve to help your learning environment fun and effective?

---

---

## FEEDBACK

"The capacity to learn is a gift; the ability to learn is a skill; the willingness to learn is a choice."

- Brain Herberr

Please be honest, constructive and specific so that I can identify what I should improve and what I should adapt in our new semester.

1. What do you like most about this semester?

In this semester sufficient time, co-operation between leaders and members are better than before. And also learn new component in this semester.

2. What would you like more in coming semester? If we do similar activities should we consider any modifications?

I would love to learn new components and basic information of biochip. It is better to teach in basic way like this semester than previous semester.

3. What is something that you know you need to work on as a HMG student? How might you develop that skill in this semester?

\* As a HMG student, I need to know that it is a golden opportunity for us to upgrade our knowledge, skills and also built up our confident and Leadership.  
\* Be puntual, revision what you learn, more force and be excited about learning new things.

4. What are some specific strategies that your instructors have used that have helped you understand/made you interested in past activities?

- Speak in loud voice.
- Involvement
- Ask question
- Attention grab
- Revision / Overview of previous lessons
- Explain with example

5. Why did you continue to be a member of HMG? What are you hoping to learn in the new semester?

I continue to be a member of HMG because I am passionate about learning electronics as it is useful skill in this modern era and it is great opportunity to me to improve my confident and leadership skills. I am hoping to learn about entertainment with useful and knowledge.

6. Is there anything about the structure of the club or activities that could be change/adapt/improve to help your learning environment fun and effective?

NO changes about the structure of the club but it is better to go in flow of structure of club as previous, there is little disflow of the structure.

"If you always do what you've always done, You'll always be where you've always been."  
-T.D. Jakes

## FEEDBACK

"The capacity to learn is a **gift**; the ability to learn is a **skill**; the willingness to learn is a **choice**."

- Brain Herberr

Please be honest, constructive and specific so that I can identify what I should improve and what I should adapt in our new semester.

1. What do you like most about this semester?

The thing that I like the most about this semester is that I learn the simplest method of preserving our environment even if we invent new things. I like my own project as well. The differences between my previous semester and now was the leaders. Previous leaders were better for me. The leader of solar project doesn't seem confident while teaching.

2. What would you like more in coming semester? If we do similar activities should we consider any modifications?

I think everything is good enough; I don't think that there should be some modifications.

3. What is something that you know you need to work on as a HMG student? How might you develop that skill in this semester?

Being an HMG students I think everyone should know and do their responsibilities sincerely. We can develop that skill in this semester by being punctual and working together in a group.

4. What are some specific strategies that your instructors have used that have helped you understand/made you interested in past activities?

There are not some specific strategies that my instructors have used that have helped me to understand and made me interested in past activities. The instructors are not well prepared and was not confident on their own knowledge.

5. Why did you continue to be a member of HMG? What are you hoping to learn in the new semester?

I continue to be a member of HMG because I have gain a lot of knowledge from HMG. I wanted to know more than this. I hope the coming semester would be more than good.

6. Is there anything about the structure of the club or activities that could be change/adapt/improve to help your learning environment fun and effective?

There is something that could be change/adapt and improve to help one in learning environment fun and effective by also involving visual information and the leaders should be confident on their own knowledge.

"If you always do what you've always done, You'll always be where you've always been."

# FEEDBACK

"The capacity to learn is a **gift**; the ability to learn is a **skill**; the willingness to learn is a **choice**."  
— Brain Herberr

Please be honest, constructive and specific so that I can identify what I should improve and what I should adapt in our new semester.

1. What do you like most about this semester?

In this semester I like that while we were at HMG classes with learning about electronic things we also get chance to do practice with that we learnt in this semester.

2. What would you like more in coming semester? If we do similar activities should we consider any modifications?

I would like to do group work in coming semester. Yes, if we do similar activities we should consider modification.

3. What is something that you know you need to work on as a HMG student? How might you develop that skill in this semester?

As a HMG student I know that I need to co-operate with HMG leaders and also I have to pay attention while leaders is running HMG classes. I might develop that by paying attention and participating in teamwork.

4. What are some specific strategies that your instructors have used that have helped you understand/made you interested in past activities?

The specific strategies that my instructors have used that have helped me to understand / made me interested in past activities that they do group work

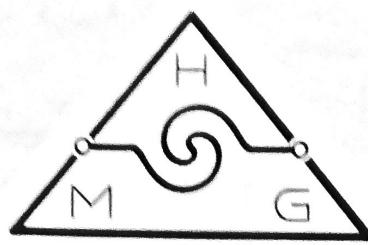

5. Why did you continue to be a member of HMG? What are you hoping to learn in the new semester?

I continue to be a member of HMG because I get chance to learn many new things that is related to electronic and also I like it. I am hoping to learn more new things about electronic in new semester.

6. Is there anything about the structure of the club or activities that could be change/adapt/improve to help your learning environment fun and effective?

No, this is the best way I can think about.

"If you always do what you've always done, You'll always be where you've always been."

## FEEDBACK

"The capacity to learn is a gift; the ability to learn is a skill; the willingness to learn is a choice."

- Brain Herberr

Please be honest, constructive and specific so that I can identify what I should improve and what I should adapt in our new semester.

1. What do you like most about this semester?

I like each and every things about this semester. like I don't know many things about electricity and electronic device once I join than I understand those things. I also like those co-operation while practice.

2. What are you hoping to learn in the new semester? If we do similar activities should we consider any modifications?

Actually I am hoping to discovery new things in new semestev. I don't think it need any modification, but I think that those who teach they should focus to all and specially to weak.

3. What is something that you know you need to work on as a HMG student? How might you develop that skill in coming semester?

I know that I need to be responsible as a HMG Student because I had miss few activities. I can develop that skill in coming semester by making Seclull and by making time table on each and every things.

4. What are some specific strategies that your instructors have used that have helped you understand/made you interested in past activities?

Some strategies that our instructors have used to my interested in past activities by they teach or instruct us with the help of multimedia which is so beneficial to us for understand.

5. Why do you want to continue to be a member of HMG?

I want to continue to be a member of HMG because I want to discover a new device to check body whether the electronic device is present or not to make possible of this dream I need help from HMG so, that I can discover.

6. Is there anything about the structure of the club or activities that could be change/adapt/improve to help your learning environment fun and effective?

Yes, I think to improve to help us learning environment fun and effective those who instruct have to make fun and enjoyment while activities and they need to improve the things as make fun don't be serious as class room we are here for enjoy and learn.

"If you always do what you've always done, You'll always be where you've always been."

## FEEDBACK

"The capacity to learn is a gift; the ability to learn is a skill; the willingness to learn is a choice."

- Brain Herberr

Please be honest, constructive and specific so that I can identify what I should improve and what I should adapt in our new semester.

1. What do you like most about this semester?

I like the most is researching parts of projects.

2. What would you like more in coming semester? If we do similar activities should we consider any modifications?

I would like to build something new, fun and interesting in the coming semester. No, we shouldn't do the similar activities and learn something new.

3. What is something that you know you need to work on as a HMG student? How might you develop that skill in this semester?

The main thing I know that I need to know as a HMG student is cooperation and teamwork. We might develop that skill in this semester by talking to each other and sharing their ideas and also respecting each other's opinions.

4. What are some specific strategies that your instructors have used that have helped you understand/made you interested in past activities?

The most specific strategies that my instructors have used that have helped me understand and made me interested in past activities are hands-on in the project and videos related to project.

5. Why did you continue to be a member of HMG? What are you hoping to learn in the new semester?

I continue to be a member of HMG because building new things and learning about electrical components are my interest and my passion. I am hoping to learn to build a simple robot in the new semester.

6. Is there anything about the structure of the club or activities that could be change/adapt/improve to help your learning environment fun and effective?

No. ~~15~~

"If you always do what you've always done, You'll always be where you've always been."  
-T.D. Jakes

# FEEDBACK

"The capacity to learn is a gift; the ability to learn is a skill; the willingness to learn is a choice."

- Brain Herbell

Please be honest, constructive and specific so that I can identify what I should improve and what I should adapt in our new semester.

1. What do you like most about this semester?

I like most about the semester is that the exhibition was fulfilled and successful.  
Experiment and coding system of AR PROJECT...

2. What would you like more in coming semester? If we do similar activities should we consider any modifications?

All the things are running well and great but the leaders should have to be more interactive and it would be better if they speak more loudly. And should make sure that the learner should have understood clearly.

3. What is something that you know you need to work on as a HMG student? How might you develop that skill in this semester?

The learners should have the basic skills and main foundation of HMG and

4. What are some specific strategies that your instructors have used that have helped you understand/made you interested in past activities?

No

The way that instructors teach

5. Why did you continue to be a member of HMG? What are you hoping to learn in the new semester?

I continue to be a member of HMG because to learn something new abt the components and their uses and to have some information on electronics.

6. Is there anything about the structure of the club or activities that could be change/adapt/improve to help your learning environment fun and effective?

All are running smoothly and nicely but the one who is guiding should be more interactive and should influence their students by the environment should be fun and should speak up.

"If you always do what you've always done, You'll always be where you've always been."

## FEEDBACK

"The capacity to learn is a **gift**; the ability to learn is a **skill**; the willingness to learn is a **choice**."

- Brain Herberr

*Please be honest, constructive and specific so that I can identify what I should improve and what I should adapt in our new semester.*

1. What do you like most about this semester?

The most thing that I like about this semester is team work and co-operation etc.

2. What would you like more in coming semester? If we do similar activities should we consider any modifications?

I like more creativity and challenging in upcoming semester. If we do similar activities we should consider more modifications in effective way.

3. What is something that you know you need to work on as a HMG student? How might you develop that skill in this semester?

As a student of HMG, the something that I need to know and work on I need to give full concentrate in every thing that they are teaching while they are giving any information. But in upcoming semester I will probably give my full concentrate in every steps and participating more in the

4. What are some specific strategies that your instructors have used that have helped you understand/made you interested in past activities?

The some specific strategies that my instructors have used that have helped me to understand and made me interested in past activities were, my instructor used to tell some facts, interesting jokes and etc to interest me in activities. I also like they way we of explaining.

5. Why did you continue to be a member of HMG? What are you hoping to learn in the new semester?

I continue to be a member of HMG because I love to learn new things and love to experiment in various things. This, is the first reason why I continue to be a member of HMG. I am hoping that upcoming semester will be more interesting and challenging.

6. Is there anything about the structure of the club or activities that could be change/adapt/improve to help your learning environment fun and effective?

I think, there isn't need any more things to improve or change about the structure of the club or activities that help you to learning environment fun and effective.

"If you always do what you've always done, You'll always be where you've always been."

## FEEDBACK

"The capacity to learn is a **gift**; the ability to learn is a **skill**; the willingness to learn is a **choice**."  
- Brain Herbell

Please be honest, constructive and specific so that I can identify what I should improve and what I should adapt in our new semester.

1. What do you like most about this semester?

What I liked most was trying practically to build circuits.

2. What are you hoping to learn in the new semester? If we do similar activities should we consider any modifications?

In new Semester I am hoping to learn about programming and car projects. If you guys do similar activities you should consider modification by studying more deeply and widely.

3. What is something that you know you need to work on as a HMG student? How might you develop that skill in coming semester?

As a HMG student, I need to work on searching and studying about technological elements.

I should develop that skill in coming semester by showing more interest.

4. What are some specific strategies that your instructors have used that have helped you understand/made you interested in past activities?

---

---

---

---

5. Why do you want to continue to be a member of HMG?

I still need to gain lot of knowledge.

---

---

---

---

6. Is there anything about the structure of the club or activities that could be change/adapt/improve to help your learning environment fun and effective?

I think there should be a creativity class where each one can meet their imagination by creating their work. There should be resources where we can get interesting projects and activities.

## FEEDBACK

"The capacity to learn is a gift; the ability to learn is a skill; the willingness to learn is a choice."

- Brain Herberr

Please be honest, constructive and specific so that I can identify what I should improve and what I should adapt in our new semester.

1. What do you like most about this semester?

This semester, I like the fact that we were more independent than the previous semester and that my acquisition of learning about solar calculations were fulfilled.

2. What would you like more in coming semester? If we do similar activities should we consider any modifications?

In the coming semester, I would like to see new activities rather than the old one, yes, I think we should consider some modifications even if we do the same activities. It is very beneficial in learning new activities.

3. What is something that you know you need to work on as a HMG student? How might you develop that skill in this semester?

working collaboratively, utilizing the knowledge learnt from past activities and using creativity are the things that I know that I need to work on as a HMG student. I might develop those skills by thinking carefully.

4. What are some specific strategies that your instructors have used that have helped you understand/made you interested in past activities?

Being frank while teaching and introducing interesting facts and news related to the subject are some specific strategies used by my instructors in the past activities.

5. Why did you continue to be a member of HMG? What are you hoping to learn in the new semester?

I continue to be a member of HMG because I have gained a great deal of knowledge from the classes and I hope to learn more about the electronics. I am hoping to learn new activities of a simple kind.

6. Is there anything about the structure of the club or activities that could be change/adapt/improve to help your learning environment fun and effective?

No, there isn't anything. The learning environment is fun and effective currently.

"If you always do what you've always done, You'll always be where you've always been."  
-T.D. Jakes

# FEEDBACK

"The capacity to learn is a **gift**; the ability to learn is a **skill**; the willingness to learn is a **choice**."

- Brain Herberr

Please be honest, constructive and specific so that I can identify what I should improve and what I should adapt in our new semester.

1. What do you like most about this semester?

→ The thing that I like the most about this semester is that exhibition was better. and it was run successfully. I like the most it is that instructor (tashi choeden) have work very hard and in this semester and he have influence us through his hard work and dedication towards electronics and us. the components that the teacher teaches us And I hope our next instructor will also be active, punctual and attentive like tashi choeden.

2. What would you like more in coming semester? If we do similar activities should we consider any modifications?

→ I would like more if the leaders of the each group seems confident about their own knowledge.

→ If we do similar activities, I think we should not consider any modifications as it is running well.

3. What is something that you know you need to work on as a HMG student? How might you develop that skill in this semester?

→ The things that I need to work on as a HMG student is that we should be more responsible and punctual. We should be able to work in a team. We should be able to understand each other. the most thing is that we should be able to know about Components that used in Solar projects and car projects. We should be have all knowledge about designing Solar lights and cars.

→ I might develop that skill in this semester by being punctual and being more attentive in during class so that I can learn about that.

4. What are some specific strategies that your instructors have used that have helped you understand/made you interested in past activities?

→ No, There are not any specific strategies that my ~~instructors~~ <sup>team leader</sup> have used that have helped me understand/made me interested in past activities. the Doing research on computer make me interested in past activities.

5. Why did you continue to be a member of HMG? What are you hoping to learn in the new semester?

→ I continue to be a member of HMG because I am learning many new things day by day. I am learning about different Components used in building up solar cars and designing self driving cars. I know about each and every details of the components even though I couldn't keep all them all in those all things in my mind. HMG is being very beneficial to me because I can fix the broken Solar cars at village and even I did it.

→ I am hoping to learn more about electronics and designing new devices or things.

6. Is there anything about the structure of the club or activities that could be change/adapt/improve to help your learning environment fun and effective?

→ Actually, there is nothing about the structure of the club or activities that should be improve to help my learning environment fun and effective. But I think leaders that lead the specific group should be trained well and should be well informed about the lesson. because I saw that leaders are not sure about themselves are not sure about what they are teaching.

"If you always do what you've always done, You'll always be where you've always been."

# FEEDBACK

"The capacity to learn is a **gift**; the ability to learn is a **skill**; the willingness to learn is a **choice**."  
— Brain Herberr

Please be honest, constructive and specific so that I can identify what I should improve and what I should adapt in our new semester.

1. What do you like most about this semester?

I like most about Pg this semester was practical.  
which I take more concentrate to do  
practical

2. What would you like more in coming semester? If we do similar activities should we consider any modifications?

I would like to more coming semester was new  
activity which is very interesting to other  
people who are not Pg my member and also  
not a car project and solar project because  
of this project is not interesting.

3. What is something that you know you need to work on as a HMG student? How might you develop that skill in this semester?

I know that I need to work on as a HMG  
student way to co-operate with member and  
to respect the leader

I need to develop that step II coming on  
this semester was programming.

4. What are some specific strategies that your instructors have used that have helped you understand/made you interested in past activities?

Some specific strategies that my instructor have used  
that to understand was Smart phone, white board,  
projector, laptop etc.  
laptop made me interested in past activities.

5. Why did you continue to be a member of HMG? What are you hoping to learn in the new semester?

I continue to be a member of HMG because Electronic  
education is very important in now days.

I am hoping to learn in the new semester  
was about the Radio frequency which is  
very important in now days.

6. Is there anything about the structure of the club or activities that could be change/adapt/improve to help your learning environment fun and effective?

No,

"If you always do what you've always done, You'll always be where you've always been."

-T.D. Jakes

# FEEDBACK

"The capacity to learn is a gift; the ability to learn is a skill; the willingness to learn is a choice."

- Brain Herberr

Please be honest, constructive and specific so that I can identify what I should improve and what I should adapt in our new semester.

1. What do you like most about this semester?

In this semester, I like most about learning and observing something new / components that I have ever seen in my life. Hands on and comfortable language have provided me more knowledge that I also like the most.

2. What would you like more in coming semester? If we do similar activities should we consider any modifications?

In coming semester, I would like to learn not by only theory but also visually (Projector) which will attract more interest in the subject and also remain for long time in our memory.  
I would also like to do activities in various places so that they would not get bored by staying in only one place.  
Yes, I think we should consider more notifications so that new members would get more knowledge compared to older.

3. What is something that you know you need to work on as a HMG student? How might you develop that skill in this semester?

As a HMG student, something that I need to work on is firstly I should be responsible and punctual. I need to share as much idea as I process with freely so others can learn something that they don't know before. I might develop that skill in this semester by making myself feel comfortable with every member so I can share my idea without hesitate. I

4. What are some specific strategies that your instructors have used that have helped you understand/made you interested in past activities?

- Hands on and visual using multimedia in projector have made me understand in past activities  
- I have never felt shy to ask questions and asking questions have taught me many new things.  
- Instructor always make me more comfortable to share any idea, ask questions, doubt.

5. Why did you continue to be a member of HMG? What are you hoping to learn in the new semester?

I continued to be a member of HMG because going in HMG teach me the value to learn about electronic which is very essential in every step our life in today's generation. So, I want to carried out this club reliable so that not only me others students would also get the great opportunity to go in such a important club. I want to learn about the basic problems of electronic that occurs in our house (fan, light).

6. Is there anything about the structure of the club or activities that could be change/adapt/improve to help your learning environment fun and effective?

Yes, there is something about the structure of the club or activities that I could be improve to help me learning environment fun and effective by activities like practical, hands on, documentary should be provided more. I think we should not only do our activities in a specific place but also in different phtation (children park).

"If you always do what you've always done, You'll always be where you've always been."

-T.D. Jakes

# FEEDBACK

"The capacity to learn is a **gift**; the ability to learn is a **skill**; the willingness to learn is a **choice**."

- Brain Herberr

*Please be honest, constructive and specific so that I can identify what I should improve and what I should adapt in our new semester.*

1. What do you like most about this semester?

→ When our group leader taught us about how to used the components and did that in practical is the most that i like in this semester.

---

---

---

2. What would you like more in coming semester? [If we do similar activities should we consider any modifications?]

- I think if everyone participate, when "making their project. Then it will more beneficial for every.
- In last semester some team member were only involved in chart making that was not knowledgeable. So, it's better to put every one's hand in project.

---

---

3. What is something that you know you need to work on as a HMG student? How might you develop that skill in this semester?

- being as a HMG student, I think we member must need to be confident, involved in task which are given by member, and have to share their idea.
- I developed my skill by working with my gropes and also I learned to speak in better way when we are giving answer to the Adience.

---

---

4. What are some specific strategies that your instructors have used that have helped you understand/made you interested in past activities?

There wasn't any specific strategies.

5. Why did you continue to be a member of HMG? What are you hoping to learn in the new semester?

- I continued to be a member of HMG because I wanted to learn more about various components and I can face various challenges.
- I am hoping to learn about Solar in the new semester.

6. Is there anything about the structure of the club or activities that could be change/adapt/improve to help your learning environment fun and effective?

- I think if we focus on games related components which makes member more interesting and I'm sure that they will also learn more and effectively.
- I think if the leaders teach us in loud voice and confidently while teaching, it will be better

"If you always do what you've always done, You'll always be where you've always been."
